COMMON GROUND

Common Ground — DJE Original

Organic shapes move across the composition in a loosely mirrored rhythm, gathering around a subtle central divide that feels less like a boundary and more like a place of meeting.

Layered plaster and expressive linework give the surface a sculptural quality, while repeated circular motifs create a language of continuity throughout the piece. Soft blue-grey, warm sand, and chalky ivory establish a serene foundation, punctuated by fresh citron green and delicate blush. These unexpected notes of color bring energy to the restrained palette without disturbing its sense of calm.

The composition is densely layered yet remarkably balanced. Clusters expand, overlap, and settle alongside one another, suggesting communities, experiences, and perspectives that are distinct but interconnected. The repetition of circles becomes a visual reminder of what is shared even among differences.

At 50" x 62", *Common Ground* has a commanding presence while maintaining the quiet, contemplative character central to DJE's work.

Framed *50" x 62"*
