CONSTELLATION OF ECHOS

Constellations of Echoes

Layered and luminous, *Constellations of Echoes* reads like a field of interconnected moments—each form distinct, yet part of a larger, unfolding pattern. Organic, cell-like shapes—outlined in soft charcoal—cluster and expand across the canvas, creating a sense of movement that feels both spontaneous and intentional.

A rich palette of golden ochres, warm ambers, blush tones, and deep garnets pulses against a muted, atmospheric ground. These color pockets glow from within their boundaries, suggesting memory, energy, or fragments of experience held in place. Beautifully Framed In Gold and cream Floater frame
