

FROM THE SAME STEM

From The Same Stem — DJE Original

18" x 22" | Framed Original Art

Organic and quietly symbolic, *From the Same Stem* explores individuality within a shared origin. A single dark, gestural line rises through the composition, branching into a series of rounded forms that extend outward in alternating directions—each unique, yet unmistakably connected to the same central source.

Warm tones of burnt orange, terracotta, ochre, and deep crimson fill the branching forms, creating a rich contrast against the softly layered neutral ground. The charcoal outlines lend strength and definition, while their imperfect, hand-worked quality keeps the composition fluid and distinctly human.

A meaningful original—warm, grounded, and beautifully rooted in belonging.

Framed size: 18 x22
