NECESSITY OF TENDERNESS

Necessity of Tenderness
Mixed Media on Canvas

Necessity of Tenderness is a commanding diptych that explores the essential role of compassion amid strength, memory, and change. Spanning two canvases, the composition unfolds as a continuous visual dialogue—where layered forms, handwritten reflections, and expressive mark-making create a landscape of quiet emotional power.

A palette of warm ochres, muted blush, slate grey, olive, and charcoal builds depth through successive layers of paint, graphite, collage, and abrasion. Architectural forms and fragmented passages emerge and dissolve beneath the surface, while drips and gestural lines reveal the artist's process, allowing the history of the work to remain visible.

Expansive in scale and rich in texture, *Necessity of Tenderness* is both contemplative and architectural.
