THE QUIET CURRENT 1

The Quiet Current I — DJE Original

A poetic original—atmospheric, contemplative, and quietly alive. *The Quiet Current I* captures a moment of beauty emerging from movement. A singular organic form floats at the center of the composition, blooming in layered tones of blush, coral, ivory, and warm yellow—delicate yet luminous against the cooler field surrounding it.

Sweeping washes of blue, violet, teal, and muted green move across the canvas like water, air, and shifting light. Visible brushwork gives the background a gentle current, creating movement without disrupting the stillness of the central form.

There is a compelling contrast between energy and restraint—the surrounding layers remain fluid and evolving, while the central bloom holds its place with quiet confidence. Flecks of unexpected color emerge within its petals, suggesting that even in stillness, there is complexity and life.

Framed size:23.5 x 27.5
