THE QUIET CURRENT II

The Quiet Current II — DJE Original

Lush and dreamlike, *The Quiet Current II* expands on the collection's exploration of stillness within movement. Soft floral forms drift across the canvas, appearing and receding within layers of water-like color—as though caught in a gentle current and carried effortlessly through the composition.

Blush pinks, creamy whites, and touches of warm coral emerge against an atmospheric field of blue, sage, lavender, and muted aqua. Loose, gestural brushwork creates the sensation of rippling water and reflected light, while the clustered blooms provide moments of softness and visual pause.

Unlike a traditional floral study, the flowers feel almost abstract—less about botanical detail and more about memory, movement, and the fleeting beauty of a moment. Some forms remain distinct while others dissolve into their surroundings, creating a sense of depth that shifts with every glance.

A serene original—fluid, romantic, and quietly captivating.

Framed size: 23.5 x 27.5
